

LOMADA RUPESH REDDY

Software Developer

Hyderabad, India | +91 9440521160 | rupeshreddylomada@gmail.com | LinkedIn | GitHub | Portfolio

CAREER OBJECTIVE

Software Developer with strong foundations in Java, Spring Boot, REST APIs, React, and relational/NoSQL databases. Experienced in building scalable backend services and end-to-end web applications using Spring Boot, Hibernate, JPA, PostgreSQL, and MySQL. Eager to contribute to a collaborative team while continuously learning and delivering high-quality software.

TECHNICAL SKILLS

Languages	Java, Python, SQL, JavaScript
Backend Technologies	Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, Microservices, RESTful APIs, JSON
Frontend Technologies	HTML5, CSS3, React, XML, Swagger / OpenAPI
Databases	MySQL, SQLite, PostgreSQL, MongoDB, Redis, Flyway, Liquibase
Tools & IDEs	Cursor IDE, IntelliJ IDEA, Maven, Git, GitHub, Docker, Jenkins, Postman
Testing	JUnit, Mockito, Spring Boot Test, Unit Testing, Integration Testing
Cloud & DevOps	AWS EC2, AWS S3, Kubernetes, CI/CD, GitHub Actions

INTERNSHIP EXPERIENCE

AI & Machine Learning Engineer Intern – MSDE Skill India (PMKVY)

Oct 2024 – Mar 2025

Machine Learning · Artificial Intelligence · NSQF Level 5

- Completed a 480-hour government-recognized internship under PMKVY, certified by NASSCOM's IT-ITeS Sector Skill Council and recognised by NCVET (Certificate No. AEKAA0021QG-05-IT-00494-2023-V1.1-NASSCOM-086182).
- Certified as an AI Machine Learning Engineer at NSQF Level 5 (16 credits, Grade B) via Cambridge Institute of Technology, North Campus.

PROJECTS

Enterprise Grade Java RAG System

Java · Spring Boot · Spring AI · REST APIs · PostgreSQL · Redis · Docker · OpenAI API · Maven · Git

- Designed and developed an enterprise-style Retrieval-Augmented Generation (RAG) system using Java and Spring Boot.
- Built REST APIs for document ingestion, chunking, embedding generation, semantic search, and AI response generation.
- Integrated a PostgreSQL vector store and Redis caching to improve retrieval speed and response handling.
- Followed layered architecture, DTO patterns, and exception handling; tested APIs using Postman.

Desktop Activity Tracking System

Java 21 · Spring Boot · Spring Data JPA · Hibernate · PostgreSQL · SQLite · Liquibase · REST APIs · React · Vite · Maven · Git

- Developed an employee activity tracking system with a Java desktop agent, Spring Boot backend, and React/Vite admin dashboard.
- Built a Windows tracking agent using JNA to capture active window metadata, idle/active status, lock/unlock events, and work session activity.
- Implemented SQLite local buffering and scheduled sync jobs to reliably send desktop activity events to backend REST APIs.
- Designed backend APIs and database models for employee management, device registration, dashboard summaries, daily reports, application usage, and anomaly review.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science & Engineering

2021 – 2025

Cambridge Institute of Technology, North Campus, Bangalore — affiliated with Visvesvaraya Technological University (VTU)
CGPA: 7.3 / 10
